

OCCUPATIONAL RISK PREVENTION POLICY

CORAL HOTELS is totally aware of the Security and Health conditions of its staff members. One of the priorities of CORAL HOTELS is the development of an Occupational Risk Prevention Policy. The reason of this policy is to promote the improvement of the work conditions, in order to increase the level of protection, security and health levels for all staff members, developing at the same time safe work habits. The management's commitment in this respect is to adapt the different necessary actions.

The policy is based on the following basic principles:

1. The responsibility in relation with the risk prevention will be directly assigned to the task of each employee. In order to achieve this responsibility it will form part of the whole activity of CORAL HOTELS and will be applied on all hierarchical levels: from the top management down to all workers.
2. The different management levels of CORAL HOTELS will include the prevention policy in all activities done or asked from the employees to be done and they will keep it in mind for all decisions they take, as well as to include it in the decisions about technical processes, the organization of the different tasks and services.
3. The Occupational Risk Prevention Policy must be integrated in the daily activities of CORAL HOTELS, in the same way as there are the production, the quality and the costs.
4. We all must inform our superiors about the different situation and any possible deficiencies that might be a danger for other persons, for the environment or the facilities of the property.
5. All accidents can be avoided. Therefore we must do every effort possible to avoid them.
6. We all must respect the Legislation, Norms and internal instructions in relation with the Occupational Risk Prevention.
7. To encourage all employees to attend any training about security and health issues, cooperating together with CORAL HOTELS in order to increase the security standards.
8. To encourage the culture of prevention by applying:
 - a) Constant training and workshops for the employees, in order to achieve that each of them gets involved and is aware of the importance of his task in the security of the other persons, operations and facilities.
 - b) To encourage a respectful attitude towards the security and health of all employees.

Your security is important to us! That's why CORAL HOTELS count on all its employees to follow the above rules, to assist in the prevention, which is considered a necessity for all of us.

Playa de las Américas, 6th April 2017

Manuel Antonio Rodríguez Ruíz
